

RZE-R Cable Ladder System

for shipbuilding in HDG material

Sideways adjustment

Place the ladder upright on a pallet, then line up the hole to the edge of the pallet. Simply step and press down on the side rail to adjust sideways. This technique is useful for avoiding obstacles like pipes.

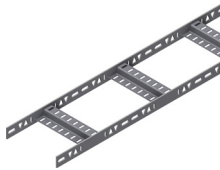

Riser slots

The RZE-R side rails feature a hole pattern, which allows the ladder to be partially cut, then bent to create vertical risers. The cuts can then be welded in place if necessary.

RZE-R Cable Ladder

Flexible Cable Ladder with Z-profiled and slotted rungs. The ladder features perforation on the siderails to easily change direction vertically or sideways. Length = 3 m.
